The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address _.				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-78 are rejected under 35 U.S.C. 102(e) as being anticipated by Vail et al.

Vail et al disclose an optical signal amplifier (figure 1) comprising: at lest one source of pumping light (130 and 140) configured to produce light having a predominate polarization state; at lest one depolarizer (138 and 142) comprising a birefringent optical component (PM fiber) having a principle axis oriented at about 45 degrees (1508) with respect to said predominate polarization state and coupled to receive pumping light from a source (1502) and outputting a pumping beam having a degree of polarization in the range of greater than 1 percent to approximately 40 percent (figures 14A and 14B).

Application/Control Number: 10/645,528

Art Unit: 3663

The structure recited in the previous paragraph reads on claim 1.

Single-mode, forward or backward pumped, dispersion shifted fiber (claims 2-4, 15, 16, 23 and 29) read on the inherent properties of the fiber disclosed by elements (126 and 128) of Vail et al.

The DOP ranges recited by claims 5-14, 17-22, 24-28 and 31-35 are taught by figures 14A and 14B.

Claims 36-70 are taught by the method of operation of the structure applied to claims 1-35.

Claims 71-78 are taught by the structure applied to claims 1-35.

Any inquiry concerning this communication should be directed to Mark Hellner at telephone number 571 272 6981.
